

TABELLA II

La tabella riporta il tenore zuccherino dei mosti e dei mosti concentrati in grammi per litro e in grammi per chilogrammo, determinato utilizzando un rifrattometro graduato, sia in percentuale in massa di saccarosio a 20 °C, sia in indice di rifrazione a 20 °C. Vengono inoltre forniti la massa volumica e il titolo alcolometrico volumico potenziale % vol. a 20 °C.
